SUMMARY

Frontend Developer with 2+ years of experience crafting fast, responsive interfaces in React.js and Next.js. Skilled in Redux state management, reusable component design, and building dashboards and dynamic data tables. Comfortable debugging, optimizing performance, and working closely with backend teams. Experienced in React Native through a freelance mobile app project, with a foundation in Node.js.

EXPERIENCE

Frontend developer Apr 2026 - Nov 2026

E-Nirmaan | Mumbai, Maharashtra, India

- Built an end-to-end insurance platform journey, covering login/signup, OTP verification, and dynamic PDF generation of insurance plan documents.
- Developed and launched a scalable reporting platform from scratch in React.js, owning the full frontend architecture and implementation.
- Migrated legacy PHP Laravel applications to React.js and Next.js, redesigning the frontend architecture, integrating REST APIs, and improving performance, scalability, and maintainability.
- Generated PDFs using multiple libraries and optimized file size, reducing download time and improving the user experience.
- Implemented centralized state management with Redux, improving data consistency and maintainability across multiple modules and user workflows.
- Designed a library of reusable, modular UI components that cut development effort and kept the UI consistent across the application.
- Developed and maintained an HRMS web application in React.js, with responsive UI and REST API integration for employee and HR workflows.
- Contributed to code reviews, debugging, and feature planning, supporting code quality and best practices across the team.

Frontend developer Dec 2023 - Apr 2026

LineupX | Mumbai, Maharashtra, India

- Developed and enhanced user-facing features using React.js and Next.js, following design and business requirements.
- Created and maintained dashboards, dynamic tables, and custom input components used across multiple modules.
- Integrated frontend applications with backend services by consuming REST APIs and handling state using Redux.
- Performed code stitching by merging new features into existing codebases while maintaining consistency and stability.
- Debugged and resolved UI, API, and state-related issues during development and testing cycles.
- Refactored existing components to improve code quality, reusability, and performance.
- Collaborated with backend developers to understand data flôw and API contracts.
- Contributed to mobile application development using React Native for shared functionality and UI implementation.
- Used GitHub for version control, managing branches, resolving merge conflicts, and participating in code reviews.
- Participated in sprint planning, daily stand-ups, and agile development processes.

SKILLS

- **Frontend:** React.js, Next.js, JavaScript, HTML5, CSS3, UI development
- **State Management & APIs:** Redux, REST API Integration
- **UI & Styling:** Tailwind, Bootstrap, Material UI, Responsive Design
- **Performance & Optimization:** Code splitting, Lazy Loading, Memoization
- **Tools:** GIT, Github, Chrome DevTools
- **AI Tools:** Open AI Codex, Gemini, Claude code, Github Copilot
- **Mobile & Backend (Working Knowledge):** React Native, Node.js
- **Languages:** English, Hindi, Marathi

PROJECTS

Music Streaming Web Application (Full Stack), Personal Project, Mumbai, Maharashtra, India

- Designed and developed a full-stack music web application that allows users to upload, store, and listen to audio files.
- Implemented user authentication and secure file upload functionality to manage user-specific music content.
- Integrated Supabase storage for handling and storing MP3 audio files, ensuring reliable and scalable media storage.
- Used MongoDB as the primary database to manage user data, song metadata, and application records.
- Built responsive and interactive frontend interfaces using React.js, focusing on smooth playback and user experience.
- Developed backend APIs using Node.js to handle file uploads, data r¯etrieval, and business logic.
- Implemented music listing, playback controls, and basic state management for seamless user interaction.

Full Stack Blogging Web Application (MERN Stack), College Project, Mumbai, Maharashtra, India

- Developed a full stack blogging platform using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Implemented user authentication with secure login and signup functionality.
- Built complete CRUD operations for blog posts, including create, read, update, and delete features.
- Designed responsive frontend components using React.js for seamless content creation and browsing.
- Created RESTful APIs to manage users, blog posts, and application data. Integrated MongoDB for storing user credentials, blog content, and related metadata.
- Implemented role-based access to ensure only authorized users can modify their content. Tested and debugged application workflôws to ensure data consistency and application stability.

EDUCATION

Bachelor's, Computer Engineering | Dilkap Research Institute of Engineering and Management Studies, Karjat, Maharashtra, India | (GPA: 8.63) Jan 2020 - Jul 2023

Diploma in Computer Engineering | Kala Vidyamandir Institute of Technology (Polytechnic), Mumbai, Maharashtra, India Aug 2016 - May 2019
